

VWR® 12 Channel Reagent Reservoir, With Lid

Description

Reagent Reservoir, 12 Channel, 3mL, PP, With Lid

Purpose

Designed for serial dilutions or pipetting individual reagents using up to a 12-channel pipetter

Materials

Reagent Reservoir: PP (Polypropylene)

Color: Clear

Dimensions (Unit: mm)

Lid

Features

- Eliminate the need for multiple reagent containers—save bench space
- V-shaped basins facilitate easy withdrawal of sample solutions
- Each channel holds up to 3mL
- Tight-fitting lid minimizes evaporation or contamination during incubation or storage
- Temperature: -80° ~ +121°C
- Numbered chambers ensure accurate sample reference
- Sterilized by irradiation SAL 10⁻⁶ (ISO11137)
- Shelf Life: 3 years after month of production
- Manufactured in a class 100,000 clean room environment
- Manufactured under ISO13485 and ISO9001 quality management system

VWR® 12 Channel Reagent Reservoir, With Lid
