

Benchtop High-Speed Refrigerated Microcentrifuge

LX-165T2R

Scope of Application

Mainly used for nucleic acid extraction, DNA/RNA separation, purification, virus separation and protein precipitation in the laboratory. Widely used in universities, third party testing organizations, disease prevention, medical and health, biological pharmaceutical and other related fields.

Short pre-cooling time of only 5 minutes from room temperature to 4°C

Precise temperature and centrifugal speed control ensures optimal separation results

Optimized sound design for low noise levels ($\leq 46\text{dB(A)}$)

Qingdao Haier Biomedical Technology Co.,Ltd.

Product Features

Short pre-cooling time of only 5 minutes from room temperature to 4°C

Fast sample processing at maximum speeds of up to 16,500 rpm (25,872 x g)

Precise temperature and centrifugal speed control ensures optimal separation results

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

Optimized sound design for low noise levels (≤46dB(A))

Automatic radio-frequency rotor identification (RFID) and rotor life monitoring for maximum operational safety

Real time loading imbalance detection, immediate shutdown protection in case of imbalance

Intuitive Interface

The 7-inch 45° glove-friendly touchscreen, the wide viewing angle more comfortable and practical for users of all heights

Further enhanced with access controls such as user login with password protection, the independent program data of each user is managed separately

Quick recall of up to 1000+ programs with alpha-numeric naming to minimize time between runs and for quick run start by routine users

The speed, centrifugal force, time and temperature can be changed by user during the centrifugation process

2 acceleration + 3 deceleration stages

The screenshot shows a user interface with the following elements:

- Top Bar:** Status icons (Wi-Fi, alarm, help), time (7:39PM), date (03 Jan 2011), and user info (Visitor, Login).
- Control Panel:** A slider for acceleration/deceleration settings (labeled 2 and 3).
- Display Area:** Shows 0 RPM, 00:00:00, and 23°C. Below this, it displays 16500 RPM / RCF, a checkmark, and 00:20:00, and 4°C.
- Bottom Buttons:** A snowflake icon (fast refrigeration), a right arrow (fast centrifugation), a play button (intelligent start-stop), and a lid icon (lid-closing status).
- Right Side:** A vertical list of program numbers (1-5) and a 'More' button for program storage.

Annotations for the interface:

- Acceleration/Deceleration setting.
- Target speed/centrifugal force and real-time speed display.
- Temperature set-point and real-time temperature display.
- Quick access to stored programs. 1000+ program storage, supports customized programs for convenient.
- Clear one-touch buttons for fast refrigeration, fast centrifugation, intelligent start-stop and lid-closing status.

Product Parts

Intelligent lid locking monitoring and automatic self-locking to ensure safe operation

Viewing port in the lid for observing the operating condition of the rotor

Drainage tray to prevent internal water accumulation and improve corrosion resistance

Triple-layer construction to ensure safe use

316 stainless steel centrifuge chamber is rust-free and easy to clean

Emergency lid release, pry out the white plastic plug on the side plate with a tool and pull the attached release cord at least 7 times to open the lid

USB port for exporting operation record including speed, time and temperature, operation curve with alarm messages etc.

Specifications

Model	Maximum Capacity (ml)	Max Speed (rpm)	Max RCF(xg)	Speed Accuracy	Time Setting Range	Precooling Function	Temperature Setting Range(°C)	Display
