Product Specific Information

Carrier-Free[™]

[™]

Reconstitution: Centrifuge the vial briefly, before opening to bring the contents to the bottom. Reconstitute the lyophilized protein in 100 mM acetic acid to 0.1-1.0 mg/mL to regain full activity. Make any further dilutions of the reconstituted protein in low endotoxin medium or buffered solution with FBS or tissue culture grade BSA.[™]

[™]

Storage: Store the lyophilized protein at 2-8°C, preferably desiccated. Upon reconstitution, apportion into working aliquots and store at -20°C (not in a frost-free freezer). Avoid repeated freeze-thaw cycles.

Human IL-2 Protein (PHC0026) in Functional

THP-1 cells were treated with 20 ng/mL of human IL-2 recombinant protein (Product # PHC0023) for 24 hours. Western blot was performed using anti-CIS recombinant rabbit polyclonal antibody (Product # 710864) and a 30 kDa band corresponding to CIS was observed to be upregulated upon the treatment. Tubulin was used as a loading control.
