## MAKING SPECIALTY A ROUTINE ➤

### Specialty identification panels for MicroScan microbiology systems

As yeast, fastidious organisms and anaerobes play a greater role in infectious disease, MicroScan specialty identification panels meet the challenge. Specifically, these panels:

- Provide definitive identification in only four hours
- Perform and interpret tests both manually and with a variety of MicroScan instruments
- Deliver a cost-effective solution for supplemental testing
  - Simple setup
  - Easy-to-read Substrates
  - Automated interpretation through LabPro Information Manager or online by the Biotype Lookup tool
