BagMixer® 400 CC efficiently blends any type of sample in all types of bag, without any risk of contamination. The homogenized sample is representative of the global contamination of the sample and ready for analysis. The adjustable blending force (patented) improves the bacterial extraction efficiency by adapting to the matrix. **BagMixer® 400 CC** is equipped with the **Click & Clean®** (patented) click-on paddles system that facilitates cleaning by accessing the blending chamber entirely. The glass door allows a quick control of the blending in progress.
