
eBioscience™ IHC /ICC Blocking Buffer - Low Protein

Catalog Number: 00-4953

For Research Use Only. Not for use in diagnostic procedures.

Product Information

Contents: eBioscience™ IHC /ICC Blocking Buffer - Low Protein

Catalog Number: 00-4953

Formulation: aqueous buffer, 0.09% sodium azide, proteins

Temperature Limitation: Store at 2-8°C.

Batch Code: Refer to vial

Use By: Refer to vial

Description

The IHC/ICC Blocking Buffer- Low Protein is designed for use in immunohistochemistry and immunocytochemistry protocols which require blocking of non-specific binding sites. This blocking buffer is recommended for tissues and antibodies with average levels of background staining. This blocking buffer can be used both in the blocking step and as a diluent for unconjugated antibodies and organic dye-conjugated antibodies during the antibody incubation step. This buffer is supplied as a 1X stock solution containing sodium azide.

Applications Reported

IHC/ICC Blocking Buffer - Low Protein has been reported for use in immunohistochemical staining (IHC), and immunocytochemistry (ICC).

Applications Tested

IHC/ICC Blocking Buffer - Low Protein has been tested by staining with organic dye-conjugated, and unconjugated antibodies in immunohistochemistry (Frozen and FFPE) and immunocytochemistry protocols.
