

Fluoromount-G™

Catalog Number: 00-4958

For Research Use Only. Not for use in diagnostic procedures.

Product Information

Contents: Fluoromount-G™

Catalog Number: 00-4958

Concentration: 25 mL

Formulation: aqueous buffer, 0.09% sodium azide

Temperature Limitation: Store at room temperature.

Batch Code: Refer to vial

Use By: Refer to vial

Description

Fluoromount-G™ is a clear liquid medium designed for use in mounting slides following immunofluorescent staining. This water-soluble Fluoromount-G™ is used to mount slides in which the final step of staining is aqueous. It forms a semi-permanent seal for prolonged storage of slides at 2-8°C. Fluoromount-G™ does not fluoresce and may reduce the amount of fluorochrome quenching during fluorescence microscopy. This medium is supplied as a 1X stock solution containing sodium azide.

Applications Reported

Fluoromount-G has been reported for use in immunohistochemical staining (IHC), and immunocytochemistry (ICC).

Applications Tested

Fluoromount-G™ has been tested for immunohistochemistry (IHC) and immunocytochemistry (ICC) using eFluor® Nanocrystal-conjugated, organic dye-conjugated, and unconjugated antibodies.
