
eBioscience™ Fixation/Permeabilization Concentrate

Catalog Number: 00-5123

For Research Use Only. Not for use in diagnostic procedures.

Product Information

Contents: eBioscience™
Fixation/Permeabilization Concentrate
Catalog Number: 00-5123
Handling Conditions: Use within 6 months
of opening or by date indicated on the bottle

REF

Temperature Limitation: Store at 2-8°C. Avoid agitation.

LOT

Batch Code: Refer to vial

Use By: Refer to vial

Contains formaldehyde

Description

The Fixation/Permeabilization Concentrate is intended to be used with antibodies to transcription factors and nuclear proteins, such as Foxp3 and Ki-67, as well as cytokines and chemokines. This must be used in combination with the Fixation/Permeabilization Diluent (cat. 00-5223) and the Permeabilization Buffer (10X) (cat. 00-8333). Alternatively, all buffers required for staining with these antibodies can be purchased as a set in the Foxp3/Transcription Factor Staining Buffer Set (cat. 00-5523).

Please see our Best Protocols section for more information.

Applications Tested

This has been tested by intracellular staining and flow cytometric analysis using Best Protocols: Protocol B: One-step protocol for intracellular (nuclear) proteins.

This is a 4X stock solution that must be diluted before use with the Fixation/Permeabilization Diluent (cat. 00-5223). Mix 1 part of Fixation/Permeabilization Concentrate with 3 parts of Fixation/Permeabilization Diluent.
