
eBioscience™ Flow Cytometry Staining Buffer

Catalog Number: 00-4222

For Research Use Only. Not for use in diagnostic procedures.

Product Information

Contents: eBioscience™ Flow Cytometry Staining Buffer

REF **Catalog Number:** 00-4222

Handling Conditions: Use within 6 months of opening

Temperature Limitation: Store at 2-8°C.

Batch Code: Refer to vial

Use By: Refer to vial

Contains sodium azide

Description

The eBioscience Flow Cytometry Staining Buffer is designed for use in immunofluorescent staining protocols of cells in suspension. eBioscience Flow Cytometry Staining Buffer is a buffered saline solution containing fetal bovine serum and sodium azide (0.09%) as a preservative. This buffer can be used for antibody and cell dilution steps, as well as all the wash steps required for the surface staining and flow cytometric analysis. This buffer contains animal serum proteins to help minimizing non-specific binding of antibodies.

Applications Reported

Flow Cytometry Staining Buffer has been reported for use in flow cytometric analysis.
