## Prolex™ Staph Latex Kit

PRO-LAB DIAGNOSTICS proudly presents the new Prolex™ line of blue latex agglutination systems for use in the rapid identification of clinically relevant pathogens.

The Prolex™ blue line of products employs a precise, industry leading manufacturing process, achieved after many years of research and development. Coupled with a first class QC/QA commitment, Prolex™ stands as the fastest, most accurate and reliable product line on the market today.

New Agglutination Card Design

An innovative kit offering a rapid, sensitive method to distinguish *Staphylococcus aureus* which possess coagulase (Clumping factor) and/or protein A, from other species of staphylococci. Prolex™ Staph gives rapid clear results within 20 seconds using blue latex particles against a white background.

## PRODUCT FEATURES

- As few as one colony required from primary culture
- Enhanced results with blue carboxylate-modified microparticles (CM-MP)
- Detects both Coagulase and Protein A
- Definitive results obtained within 20 seconds
- Contains negative control
- Available in 2 convenient sizes, 100 tests and 300 tests
- Includes new agglutination card design

## PRODUCT AVAILABILITY

### PL.080B

Staph Latex Kit (100 Tests)

Contains:

- Staph Latex Reagent 2 x 2.5ml
- Negative Control Latex Rgt 2.5ml
- Agglutination Cards
- Mixing Sticks

### PL.081B

Staph Latex Kit (300 Tests)

Contains:

- Staph Latex Reagent 2 x 7.5ml
- Negative Control Latex Rgt 7.5ml
- Agglutination Cards
- Mixing Sticks

### PL.086B

Negative Control

7.5ml

### PL.091

Mixing Sticks

### PL.092-48

Agglutination Cards
