

# Thermo Scientific PCR Plate Selection Guide

The Thermo Scientific™ PCR plastics portfolio provides a reliable solution for all PCR and qPCR applications from standard to high-throughput and automated processes. This guide will help you to find the Thermo Scientific PCR plate suitable for your instrument. Plate model recommendations are based on the optimal PCR performance and ease of handling.

● recommended plate

● alternative option

1 Compatible with "Perfect Fit Frames" available from Stratagene

2 For MegaBACETM 1000 purchased before July 2000, use ABgene CYCLEPLATE® (AB-1243)

3 Plates compatible with fully skirted block ONLY
